## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. **Claims 1-26** are allowed.
2. The following is an examiner's statement of reasons for allowance: All pertinent references found by the examiner, whether taken alone or in combination do not disclose all the claimed features of the present application. These references teach the concepts of having processor chips which do not require an external memory and operate solely from the processor chip and cache memory and also the concept of designating data to be written back to an external memory, then that designation being cancelled based upon some predefined conditions. But none of the references found alone or in combination teach that no cache mirror data is ever written to an external memory, even if it is designated to do so as claimed, where the term "cache mirror data" is all data written to the internal data cache. This is beneficial because the processor does not need to know or be designed to operation without an external memory.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
